

Make your return home,
an expected event

Looking for a simple, efficient and scalable home automation? Domestia has been offering for over 15 years a range of accessible, reliable and particularly intuitive products that will allow you to improve and better manage your daily life.

A basic Domestia installation already allows a multitude of integrated functions. Our system adapts to your home, to better meet your needs.

Each installation can evolve over time with the addition of flexible features to adjust the lighting, manage blinds, curtains and shutters. In the case of a higher installation, it can directly regulate the heating, brightness and humidity of your home and come and reduce your worries by optimizing your daily actions.

You can take control of your installation **from your tablet, smartphone or computer using our Home on Web remote management system from any location.**

In addition, the Domestia system is used with the majority of push button brands! You have the free choice of design and manufacturer. Let your imagination be free !

With Domestia home automation becomes incredibly simple and economical...

**You will never see home automation
again in the same way!**

DOMESTIA

Comfort

Domestia transforms your house to bring maximum comfort and make life easier for all members of the family ... This is our wish!

Management

The Domestia control screen allows you to manage your installation with ease. Centralize the management of your installation in order to benefit from all the available features in one place.

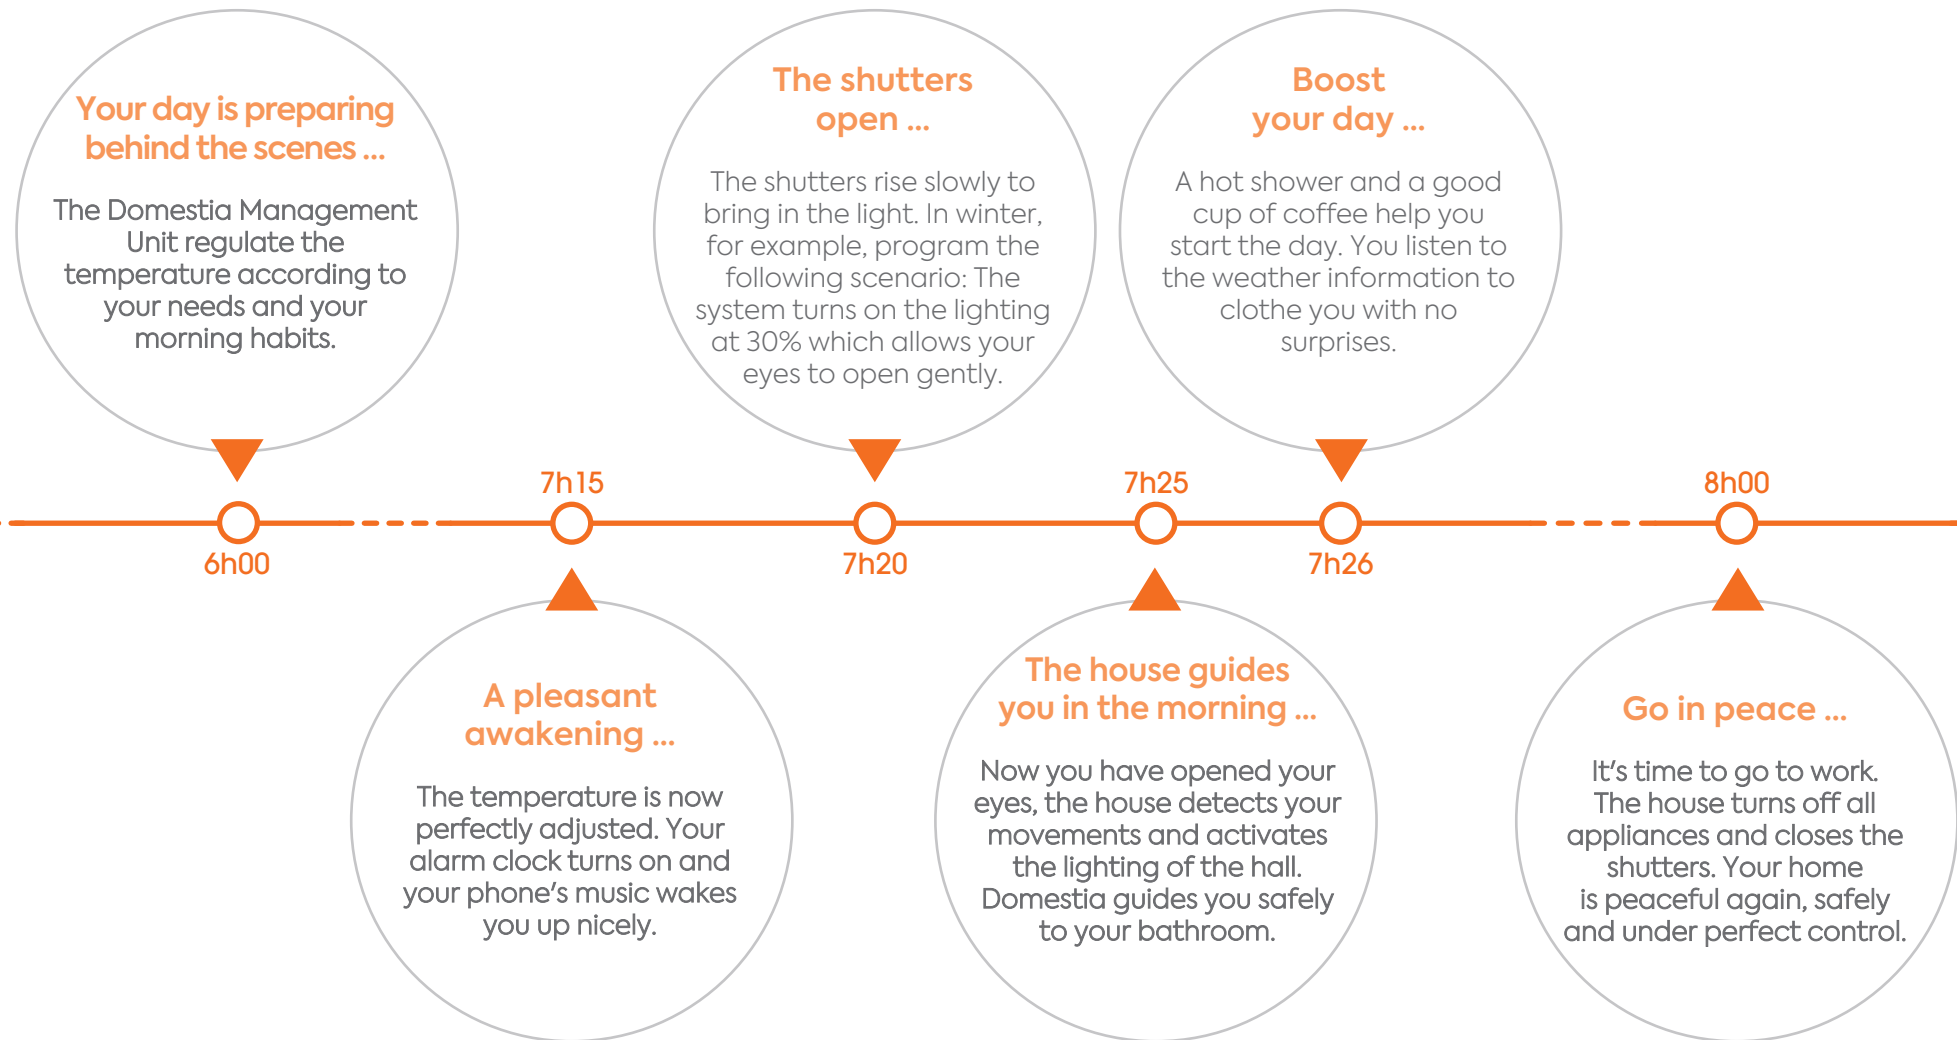

Economy

Keep an eye on your heating, lighting or shutters. No matter where you are, Domestia allows you to remotely manage your savings!

A system that adapts to your habits

Imagine a house capable of offering you a sweet and pleasant awakening. We can turn this dream into reality !

Pure simplicity

In a simplified way, allow each member of your family to interact in the house in a childlike way.

Share your comfort

Domestia offers the detail that makes the difference to complete any installation:
The creation of atmospheres. And it has never been so easy!

Imagine the most fantastic atmospheres and give free rein to your imagination, so that your
installation reflects who you are and can be a warm welcome for all your hosts.

Create your own atmosphere

Keep an eye on your electrical devices and never have unpleasant surprises on your bill.
Turn off, for example, your whole house from your bedroom or from a distance.
A switch placed next to your bed will help you to not forget anything.

Save money, not just energy

Give the impression that you are still at home.
Even on vacation give the impression that your home is inhabited during your absence.

Your alarm system activates our system!

If your alarm goes off, it can automatically trigger a "panic" scenario that will turn on all the lights and close all the shutters in your home.

Live safely

Your house is smart keep it there at your fingertips.

With Domestia Home On Web, you can control your home from your smartphone, PC / Mac and / or tablet and manage your events with a convenient weekly calendar that allows you to automate your tasks to the fullest and keep an eye out on your house at any time.

Your home at your fingertips
